INTRODUCTION

THE AVERAGE ABANDONED CART RATE WAS A WHOPPING 69.57% ACROSS ALL SECTORS IN 2021.

Brands have been trying to put their heads together to find a solution to this pressing problem. The most effective way to tackle this problem is to take proactive measures or reactive action using the right tools and strategies to reduce abandonment rates and boost conversion.

BROWSER ABANDONMENT VS CART ABANDONMENT

A browser abandonment occurs when a visitor lands on your site, browses the product or category pages but leaves without adding it to the cart.

An abandoned cart occurs when a customer browses products, adds them to the cart but doesn't complete the checkout process.

REASONS

Browser abandonment

- Difficulty navigating through the site
- Expensive products
- Difficulty in finding information
- Unable to find the exact products they were looking for
- Research and price comparison
- Window shopping
- Mobile experience

Cart abandonment

- Unexpected shipping costs
- Creating a new user account
- Lack of convenient payment options
- Lack of payment security
- Confusing checkout process
- Window shopping
- Research and price comparison
- Mobile experience

AT WHICH STAGE CAN A BUYER DROP OFF?

Browser abandonment

- Home Page
- Category Page
- Product Page
- Search bar

Cart abandonment

- Drops off without sign-up
- Drops off after creating an account
- Drops off at payment page
